

Inverted male coupling for FLX-HDPE-132-52 oval ducting

FLX-VODS

Description

FLX-VODS inverted male coupling for oval semi-rigid ducting. The inverted male coupling joins oval ducting and inverts the profile of one of the ducts. This solution comes in handy when a plenum box for air supply diffusers need to be connected with the intake upward, or when for some reason ductwork must be installed with the profile upside down.
