

Window reveal module

HRU-WALL-WREV

Description

A window reveal module for the decentralised heat recovery units - HRU-WALL series. The module is intended for installation in the facade, in the insulation layer, a ventilation grille is mounted on the window reveal. The window reveal module provides practically invisible solution for supply/extract ducting. This method of installation will be especially useful during the thermal modernization of the building. The product has a universal layout, the choice of "right-sided" or "left-sided" assembly is made at the construction site. In addition, a slope for possible condensation growth was implemented into the design. The duct is telescopic, which means that the distance from the axis of the HRU to the window reveal can be adjusted in the range of 380-490 mm.

The module is compatible with the following units:

- HRU-WALL-150-60
- HRU-WALL-RC-150-60

Product code example

Product code: **HRU-WALL-WREV - 150**

type _____
 diameter _____

Dimensions

| Ød [mm] | L [mm] | A [mm] | B [mm] | C [mm] | D [mm] | E [mm] | F [mm] |
|------------|-----------|-----------|-----------|-----------|-----------|-----------|-----------|
| 150 | 380-490 | 540 | 450 | 74 | 524 | 539 | 50 |

The window reveal modul consists of the following components - sold separately:

HRU-WALL-WREV-150

a flat duct for air supply and exhaust with mounting brackets and a sealing tape

HRU-WALL-WREV-FRAME

a mounting frame for HRU-WALL-WREV

HRU-WALL-WREV-GRILL

a grille for HRU-WALL-WREV
