

Spray for steel protection and repair

OCSP

Description

The OCSP aluminium zinc spray provides a durable protective coat on spot-repaired steel surfaces. It has excellent adhesion to different metal types and high resistance to water, salt and weathering, high temperature and abrasion. This spray is a perfect solution for protecting roof sheeting, spot welds and seam welds.

Technical parameters:

Capacity: 500 ml
Colour: silver
Auto-ignition temperature: > 370°C
Density at 20°C: 0.89 - 1.01 g/cm³

Note: Pressurized container — keep away from direct sunlight and temperatures above 50°C.
